DETAILED ACTION

1. This communication is responsive to the communication filed on 01/16/2009.

Claims 1-3 and 5-8 and 10 are pending and claims 4 and 9 were cancelled.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter: Cason (US patent 6,249,757) discloses having a system for detecting voice activity comprising a nonlinear two filter voice detection algorithm. Cason discloses the slow filter serves provides a noise floor estimate for incoming signal and the fast filter serves to more closely represent the total energy in the signal. Hoya et al. (PG PUB 2004/0054528) discloses having a noise removing system. Hoya further discloses a adaptive signal enhancer receiving signals. Etter (US Patent 072831) teaches that the noise estimator of figure includes two nonlinear filters followed by a rise-time limitation filter whose purpose is to place a limit on the maximum allowable rise of its output signal per unit of time. However, the prior art fails to anticipate or render obvious the following recited features: Claims 1 and 8 limitation :wherein said filter means comprises a notch-type filter with a notch at zero frequency , and said limitation means comprises a non-linear element with a limitation characteristic for suppressing transmission of negative signals through a recursive path of said notch-type filter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Duttweiler (US Patent 5,566,167)

Williams (US Patent 5,825,754)
